RETAIL THOUGHT LEADERSHIP

Today, it's no longer just a real estate game, but now more than ever needs a service-oriented or an experiential approach. That said, robust consumption demand recovery and rising footfalls in brick-and-mortar retail clearly signal that the market is set for the next stage of evolution. The future of the retail sector in India is not a straight line, but one consisting of new growth shoots. Indian retail has all the right triggers as it begins to assimilate global shopping trends. Premium outlet centres and highway retailing are new formats that are expected to be the next in line as the physical, organised retail market continues its growth journey. All these new formats and Mixed used retail spaces are driven by evolving consumption trends which see the middle and aspirational class asking more from retail brands and brands responding positively, proving the adage that 'customer is king'. We are in for an exciting ride, so come along and experience an immersive and interactive world of retail with industry master minds and visionaries at the Mapic India - Shopping Centre Summit and Awards 2025
